Distance Learning Solutions

Our Philosophy

HostBBB is a division of 207 Technology Group Inc. and has been providing Hosting and VOIP services since 2005.

We have been an early adopter of BigBlueButton and have demonstrated expertise in deploying complete Distance learning solutions for small businesses, entrepreneurs and application developers since Jan 2010. Our customers are globally located. (India, UK, Canada, and United, States, Scotland, Peru, Argentina, Taiwan)

We focus on rapid deployment and configuration of packaged open source applications to get your project into production. Our success is based on Hosting Revenue, and not on the quoting of large custom software development projects.

HostBBB is a division of 207 Technology Group Inc.

Frequently Asked Questions.

Data Centers

HostBBB operates servers in our own data center located in the Northeastern United States, and in Amazon EC2's Data Centers in US, Europe and Asia. We have optimized versions of BBB, that run as Standard (1 ECU) and HI-CPU (5 ECU units). Business logic can reside on your own servers, or we can host dedicated Moodle, Joomla, Wordpress, Alfresco servers.

VOIP, Inbound Telephone DIDs

OPTIONAL: Provide DID services with coverage in US/CAN, and most international countries. Users call conferences via normal telephones.
